– Goals: Drawing 3D, Perspective, Anima, and learning a bit about the world of art.

Week 1 – Drawing 3D and Perspective

Take a Drawing pencil and eraser home if you need one. Paper also is available for you on back desk. If you do not have internet create your own art projects with the resources you have.

Draw The Letter A in 3D (if you give them some size such as 3”-5” it looks better)

Easy A <https://www.youtube.com/watch?v=-BsnoVNqsRg>

With lines: <https://www.youtube.com/watch?v=DpgF4v4WVX4>

Floating A <https://www.youtube.com/watch?v=jr-zAxfTVU>

Then move on to try and draw the letters of your name or your initials.

https://www.youtube.com/watch?v=Y-x_-2Yv17Y

Week 2 - Draw a Perspective Drawing of a building or street of buildings. Remember to use shading.

<https://www.youtube.com/watch?v=-WR-FyUQc6I>

<https://www.youtube.com/watch?v=E69Bn8rPEz0>

Week 3 - Finish off Drawing with pictures you wish to do:

Cartoon characters, fruit, furniture, faces, etc.

Helpful video: <https://www.youtube.com/watch?v=tGx4sypoPjY>

Try a cartoon single or script; such as you might find in a newspaper editorial or the comic section

Week 4 – Try animation – Make a Flip Book with 3x5 index cards. If not available call the school and they can be provided when you pick up lunch – 10-20 will do. Remember only draw on one half of each card so you have flipping room. You can start out simple and as your story evolves go back and add background and additional features.

Helpful videos a bound on the internet –

Taylor's Plan for Classes-----March 24, 2020 Contact: annt@willapavalley.org

A long one: <https://www.youtube.com/watch?v=KDSCLm61Qhk>

Week 5 & 6 – Let's move to learning about Art Around the World – Internet Needed

Start with ensuring you know the countries of at least Asia and Europe. (Other continents are not a bad idea) This site is an excellent and fun source. This is the one you will be tested on upon return. It is good to have an idea of where places are located that you will be hearing on the news now and in the future.

Google Arts and Culture Site - Under the Explore tab at the top Right you will find a World of Art

I will leave it to you to choose which way you go: But please ensure you look at some 3D art of the past including one of my favorites Michael Angelo. The Activity – if you have a bar of soap or wood (if you have strong enough cutting tool) create an object be it animal, food, plant, etc. We will do this again when class starts, but if you have tried previously you will produce something even better.

Taylor's Plan

Google Classroom k2cfshz

If you do not have internet copy images today if possible, otherwise create your own art projects with what you have.

Graphic Art – Hopefully we have met the goal of finishing our yearbook – If not please finish your yearbook pages first.

Goal Now the Yearbook is Done let's learn something about ART & Photography.

You may do **EVERFI** the last 8 lessons in place of any two weeks if you prefer. The information is based under marketing and entrepreneurship and will be useful to you in your future financial transactions.

7th Grade Computers

Google Class Code hncgorb

TASK 1: You may check out a typing book and keyboards if needed. This might be especially helpful for the music students who have not had typing. If you do not have a computer, you may also check out a keyboard to practice on. We do not need to see what you typed; you just need to improve your accuracy using correct finger strokes and speed.

There is also the freetypinggames.net site where you could work through the lessons; supplementing with games and tests for enjoyment and to see how you are progressing.

TASK 2: Go to **EVERFI** Ignition New Class and after signing up (do remember the password you choose) put in this code **20c7d192** and you will be in an online program that teaches appropriate use of computers which is a State Mandatory skill you need to learn. There are about 8-10 lessons and you will receive a score for each lesson. You might wish to show your parents for this site has excellent information on computers, financial literacy and well-being.

EVERFI: <https://everfi.com/>

Code: **20c7d192**

TASK 3: Ensure you know all 50 states and their capitols first. Then move on to ensure you know the countries of Asia and Europe. This will help you now and in the future when you are listening to the news or meeting new people. (Most of you have proved you know the States and a few have even passed Asia – for those you might wish to continue with South America and Africa if you wish). World Geography Games - <https://world-geography-games.com/>

TASK 4: Optional for those doing well on the above. If you are doing very well on the above Tasks you might like to include learning on the field of computer science. When you are in high school you can take computer science courses for college credit during high school, and this program will give you an excellent start for doing well in those courses and with those skills.

The site is Carnegie Mellon University Computer Science Academy
<https://academy.cs.cmu.edu/splash>

There is a slide show to tell you and your parents about the program. This can be reached by going to the above site and clicking on the “Detailed Course Information” down in the left hand corner or at this URL address:
https://docs.google.com/presentation/d/1HORI7gbWpbmxG3Ss8epjdUN1_XpAK3IXHPuag4GitPk/edit

MCA – Micro Computer Applications

Google Class Code Class code

Goal: Learn skills on digital citizenship, a mandatory State requirement, and also some STEM Applications including an introduction to the field of Computer Science.

Computer Science is one of the fastest growing fields now, with well-paying jobs in all areas of the economy from hospitals to government to production and retail. Computer science hits every field and is now being touted as the fourth “R” from Reading, Arithmetic, and Writing with now Programming added in.

If you do not have internet you can work on the states and countries by looking at maps.

Print what you might need today.

TASK 1: Go to **EVERFI** and up in the upper right corner says Student Login – click on this.

Class Ignition New Class and after signing up (do remember the password you choose) put in this code **50cf6b97** and you will be in an online program that teaches appropriate use of computers which is a State Mandatory skill you need to learn. There are about 8-10 lessons and you will receive a score for each lesson. You might wish to show your parents for this site has excellent information on computers, financial literacy and well-being.

EVERFI: <https://everfi.com/>

Code: **50cf6b97**

You have another choice which is Future Goals – Math Code 50cf6b97-hsm and teaches some Math & engineering concepts come to life through the fast-paced game of hockey. Explore real world applications of STEM through sports, which you might find more enjoyable.

Code: **50cf6b97-hsm**

Both these programs will document your success.

TASK 2: Next year you can take computer science courses for college credit, and this program will give you an excellent start for doing well in those courses and with those skills.

The site is Carnegie Mellon University Computer Science Academy
